DECLARATION

I, Bogdire Bagonluri Michael, with Matriculation Number BTIT230221, hereby declare that this report on my industrial attachment at St. Lucy Catholic Hospital, Tamale (Kpalsi), presented to the Computer Science Department of Tamale Technical University as part of the Second Semester of the Second Year of the BTECH IT program, is the product of my own learning and effort. I boldly stand by the content of this report and am prepared to defend any part of it as may be required by my Academic Supervisor.

DEDICATION

This book is dedicated to the almighty God for the opportunity granted me to learn from this noble organization, The vice chancellor, the Dean of students, the Head computer science department and all computer science lecturers.

ACKNOWLEDEMENT

First and foremost, I express my sincere thanks to the almighty God for the gift of writing he has endowed me with and for the endurance to complete this particular book.

I am indebted to my department and the school's industrial attachment department for giving us the mandate to go out and explore more on from various institutions.

I am also grateful to the organization who granted me this opportunity to come and learn from them. I really appreciate.

Finally, I would like to thank my supervisor for the time he dedicated in ensuring that my attachment went well.

ABSTRACT

The industrial attachment training is an essential component of the curriculum of the Tamale Technical University, BTECH Computer Science Programme. During my industrial attachment at the St. Lucy Catholic Hospital Tamale (Kpalsi), I was assigned to Medical records department.

INTRODUCTION

My attachment with St. Lucy Catholic Hospital, Tamale (Kpalsi), commenced on the 22nd of December, 2025. The industrial attachment training is an essential component of the curriculum at Tamale Technical University, and no student can graduate without completing it. The attachment period is usually a maximum of four weeks, during which students are expected to acquire practical experience to supplement their course of study at the university. They are also exposed to the real world of work and its challenges, which prepares them for their future careers. This report is the outcome of the four-week practical training I undertook at St. Lucy Catholic Hospital, Tamale (Kpalsi).

THE ORGANISATION BRIEF HISTORY

St. Lucy Catholic Hospital in Kpalsi, Tamale, started as a mobile eye clinic run by the Sisters of Mary Immaculate. In 1987, it expanded into a polyclinic and was officially commissioned in 2008. It became a primary hospital in May 2022 and now serves over 190,000 people with various health services, including outpatient care, maternity, surgery, and specialized treatments. In 2023, the hospital received a mechanized borehole to address water supply challenges. The management aims to make it the most preferred healthcare facility in Tamale.

OBJECTIVES OF THE INDUSTRIAL ATTACHMENT

Attachment is an opportunity granted a student to network with employers and explore more from the working field before entering the workforce

Some of the important objectives of the industrial attachment are as follows

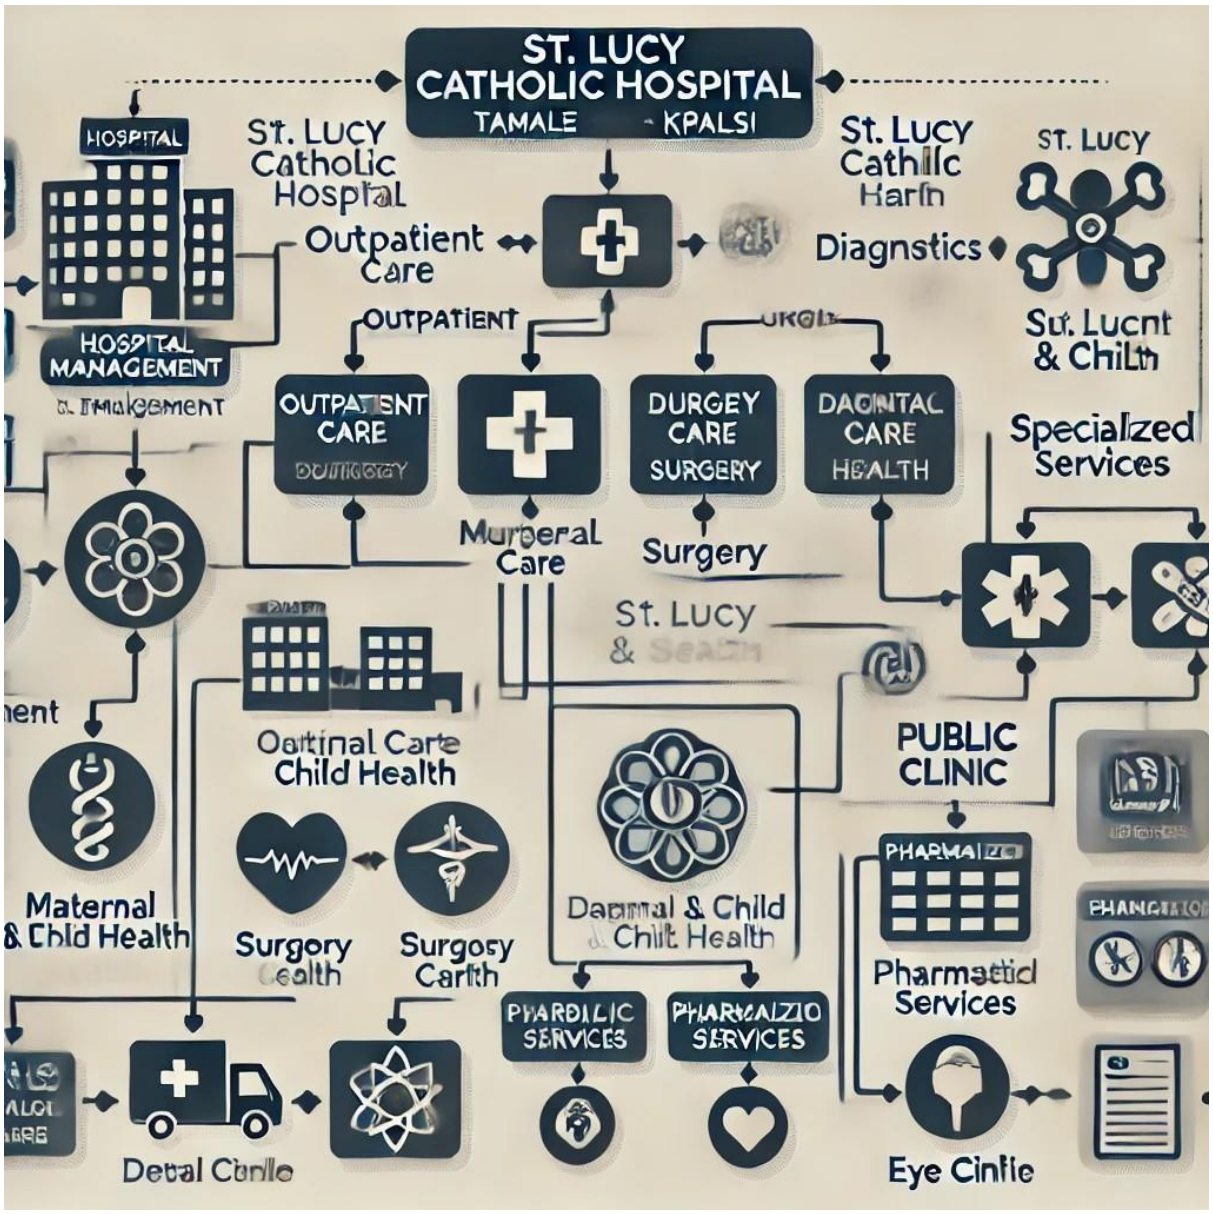
- To assess the interest of the student in the occupation he/she plans to undertake.
- To expose the students to work methods not taught in the University and to provide access to products equipment not normally available in the environment of the University.
- To provide the students with an opportunity to apply knowledge in real work situation thereby closing the gap between University work and the actual practice.
- To make the transition from school to the world of work smoothly and to enhance student contacts for job placement.
- To enlist and strengthen employer's involvement in institutional activities and in the entire educational process of preparing the students for employment in industry.
- To enhance industry´s satisfaction with the graduate of the Faculty in particular and the University at large.

BACKGROUND OF THE ST. LUCY CATHOLIC HOSPITAL TAMALE (KPALSI)

About St. Lucy Catholic Hospital in Kpalsi, (Tamale)

St. Lucy Catholic Hospital in Kpalsi, Tamale, was initially established as a mobile eye clinic by the Sisters of Mary Immaculate. In 1987, it expanded to include primary healthcare services with the involvement of laypeople and nurses. Over time, the facility evolved into a polyclinic and was officially commissioned in 2008. Due to increasing demand for healthcare services, it was upgraded to a primary hospital in May 2022. Today, it serves as a major referral center, providing a wide range of medical services to the people of Tamale and beyond. The hospital continues to expand its services and infrastructure to improve healthcare delivery in the region.

OVERVIEW OF THE ST. LUCY CATHOLIC HOSPITAL TAMALE (KPALSI)



MISSION AND VISION OF ST. LUCY CATHOLIC HOSPITAL TAMALE (KPALSI)

VISION STATEMENT

St. Lucy Catholic Hospital in Tamale aims to be the most preferred healthcare facility in the area. It aligns with the Catholic Health Service Trust Ghana's mission of providing high-quality, efficient, and community-centered healthcare while respecting patients' dignity.
For official details, it's best to contact the hospital directly.

MISSION STATEMENT

The mission of St. Lucy Catholic Hospital in Tamale is to provide high-quality, efficient, and innovative healthcare services tailored to the needs of the community while upholding the dignity of patients.

ST. LUCY CATHOLIC HOSPITAL TAMALE (KPALSI) CORE VALUES

Specific core values for St. Lucy Catholic Hospital in Tamale are not explicitly detailed in the available sources. However, the hospital's mission emphasizes providing quality and accessible health care services to all individuals in its catchment communities, especially the most deprived areas, in a manner that reflects the continued Healing Ministry of Christ on earth.

This mission suggests that the hospital upholds values such as compassion, inclusivity, and a commitment to serving the underserved. Additionally, the Tamale Archdiocesan Development Office, under which the hospital operates, lists its core values as:

- Christian
- Human-centered
- Transparency
- Accountability
- Partnership

These values likely influence the hospital's approach to healthcare delivery.

DESCRIPTION OF THE NATURRE OF THE WORK DONE AT THE DEPARTMENT

The Medical Records Department plays a crucial role in healthcare facilities by managing patient information and ensuring efficient documentation. The key responsibilities in this department include:

1. **Patient Registration** – Collecting and recording patient details during hospital visits.
2. **Record Keeping** – Maintaining accurate and confidential patient files, both electronic and physical.
3. **Retrieval and Storage** – Organizing and retrieving patient records for medical staff when needed.
4. **Data Entry and Management** – Updating patient information into hospital databases.
5. **Issuing Medical Records** – Providing medical reports and discharge summaries upon request.
6. **Confidentiality and Security** – Ensuring that patient records are kept secure and only accessed by authorized personnel.
7. **Medical Coding and Billing Support** – Assisting in coding diagnoses and procedures for billing and insurance purposes.
8. **Appointment Scheduling** – Coordinating patient appointments with various hospital departments.
9. **Data Analysis and Reporting** – Generating reports for hospital management and healthcare planning.

The Medical Records Department is essential for the smooth operation of the hospital, supporting healthcare providers with accurate patient information for effective treatment and decisionmaking.

CONTRIBUTION OF STUDENT TO ORGANIZATION

My student contribution to the organization during attachment are:

1. **Assisting with Daily Tasks** – Helping in routine activities like data entry, document management, or customer service, easing the workload of full-time staff.
2. **Supporting Research and Analysis** – Conducting research or data analysis, which can provide valuable insights for decisionmaking or process improvements.
3. **Technical Skills** – Applying modern technical skills such as coding, graphic design, or digital marketing tools, which may enhance the organization's overall performance.
4. **Enhancing Productivity** – Assisting with ongoing projects or tasks, enabling full-time staff to focus on more complex or highpriority work.
5. **Learning and Development** – By learning from professionals, I acquire practical skills, which they can apply in future roles, benefiting the organization in the long run.
6. **Boosting Team Dynamics** – Bringing enthusiasm and motivation, which can energize teams and enhance workplace morale.
7. **Improving Communication** – I have strong communication skills that I've contributed to improving internal and external communication strategies.

Overall, I contributed by supporting day-to-day operations, bringing fresh skills and ideas, and helping the organization stay innovative and dynamic.

EXPERIENCE DURING THE ATTACHMENT

During an attachment at a healthcare facility like St. Lucy Catholic Hospital, I gain a combination of practical skills and personal insights. Here are some of my experience :

1. **Hands-On Learning** – Exposure to real-world scenarios allows students to apply theoretical knowledge from their studies, such as understanding medical procedures, handling patient data, or using hospital software systems.
2. **Improved Professional Skills** – Students develop important skills like time management, communication, teamwork, and customer service while working alongside healthcare professionals.
3. **Insight into Healthcare Operations** – Learning how different departments work together in a hospital, such as patient care, medical records, or administrative support, and understanding the workflow and operational challenges of a health institution.
4. **Understanding Patient Care** – Depending on the role, students may interact with patients, learning the importance of empathy, effective communication, and maintaining confidentiality.
5. **Exposure to Medical Documentation** – In the Medical Records Department, students learn about managing patient data, ensuring its accuracy, privacy, and organizing patient files.
6. **Mentorship** – Working under the guidance of experienced professionals, students receive mentorship, which helps in career growth, personal development, and building a professional network.

Overall, an attachment provides a valuable learning opportunity where students gain both technical and interpersonal skills, preparing them for their future careers.

CONCLUSION

In conclusion, I would say that my one-month stay at St. Lucy Catholic Hospital, Tamale (Kpalsi), has taught me a lot and has also enlightened me further about technology and computers. This industrial attachment provided me with practical experience, improved my problem-solving and technical skills, and gave me a better understanding of how theoretical knowledge is applied in a real work environment. Overall, the attachment has been a valuable learning experience that will help prepare me for my future career in the IT field.
